

PF-TD50 is a THV aqueous dispersion supplied as a milky white or light yellow translucent liquid. The technical properties below are based on the product inspection report.

### PRODUCT OVERVIEW

**PRODUCT:** THV Dispersion PF-TD50

**APPEARANCE:** Milky white or light yellow translucent aqueous dispersion.

### TYPICAL PROPERTIES OF THV Dispersion PF-TD50

| Properties                         | Test Method | Unit     | PF-TD50                                                    |
|------------------------------------|-------------|----------|------------------------------------------------------------|
| Appearance                         | -           | -        | Milky white or light yellow translucent aqueous dispersion |
| Solid Content                      | -           | %        | 50 +/- 2                                                   |
| Surfactant Content                 | -           | %        | 4 - 9                                                      |
| Melt Mass-flow Rate                | -           | g/10 min | 8.0 - 12.0                                                 |
| pH                                 | -           | -        | 6.0 - 8.0                                                  |
| Relative Density at 23 +/- 1 deg C | -           | g/cm3    | 1.337                                                      |

### TECHNICAL NOTES

1. Values are transcribed from the supplied PF-TD50 product inspection report.
2. Relative density was measured at 23 +/- 1 deg C.
3. Test methods were not stated in the report and are therefore shown as "-".
